ALGERIAN SOAP TREE NO LAW WILL STOP FLIRTING DISEASE IS SPREAD BY RATS

Fruit Has a Distinct Commercial Value.

Average Income From Product Will Vary From Ten to Twenty Dollars a Year-Really Marvelous Product of Nature.

by seeds imported from that country. The name is given as Sapindus utilis. The tree is ornamental and reaches a fruit when six years old. The wood is close grained, takes a good polish and is admirably suitable for furni-

The average crop of full-grown tree is about 200 pounds of fruit. The average income from a tree is from \$10 to \$20 a year. The composition of the fruit consists in a nut-shaped hull in which is a seed. In the hull exists the saponaceous matter in the proportion of 30 to 40 per cent of the bulk of the hull. The saponaceous of the hull and using it with water just as if it were a piece of soap. A Assured Father His Daughter Would beautiful lather is the result and the cleausing qualities are such that there is no soap made by human process that can compare with them. It is equally good for tollet purposes. No sternly, "will you give her a home like human skill can produce that marvel- the one she has been used to?" ous product of nature.

The hull can also be made into a so as to make the use of it easier. It be made by such simple processes that in every household the commodity will ation and of pleasure.

The seed has a kernel which conerable to the best imported olive oil. The yield in oil of that kernel is twice necessitating the use of the proper not if I can help it."-Boston Journal machinery the oil will be produced as cheaply if not more cheaply than cottonseed oil. For a solid shortening the delicious flavor of that oil will surpass anything ever produced.

As a meal for poultry and other animals the expressed product is excellent. The leaves of the scap nut tree supply a fodder of unequaled value. Medical authorities assert that the soap nut may be used internally in

cases of salivation and as an expectorant. The seeds, pounded with water, are said to arrest a paroxysm of epilepsy. This fruit is also recommended by native practitioners for the cure of chlorosis.

The foregoing relates to the Algerian soap tree, the seed of which E. Moulie, a southern perfumer, imported for free distribution, but it applies equally well to the Florida scap tree. This tree also came originally from China, some seeds having been imported 22 years ago. These two specles bear the same name; they are of different varieties.

And Trouble Seems to Lie Rather With the Girls Than With the Boys.

Every person of sense knows that there is danger in flirting, but no law will stop the practice or relieve it of its danger. The trouble lies in the girls rather than the boys. We have been accustomed to think of our girls as too modest and refined to firt. Most of them are, but the proportion that is not is altogether too large-The Algerian soap tree originated a girl goes to work in store or facfrom China and has been propagated tory she seems to think she has been emancipated from home control, and all too often the parents make no dents. attempt to free her from this delusion. height of fifty feet. It begins to bear The consequence is that she is in constant danger because she is likely in her new-found freedom to follow the course of the pleasure-seekers among her companions. Proper home training and control of the girl until she has acquired knowledge of the dangers that beset a young girl in the world are better preventives of flirting and its accompanying evils than all the laws that all the legislatures could pass.-Rochester Union and Advertiser.

principle is set free by the shredding WAS A THOUGHTFUL SUITOR

Not Have Home Like She Had Been Used To.

"Young man," inquired her father

"No," replied the truthful suitor. "for there will be no grumpy father powder and the powder into a cake, to come home and make everyone miserable by his kicking over trifles and can also be made into a liquid for swearing at matters in general. There hair wash, dentifrice and various other will be no mother to scold her from preparations, and these articles can morning to night for wasting time merely because she wants to be neat. There will be no big brother to abuse become a source of economy, of recre. her for not doing half of his work, and no little brother to make enough noise to drive her crazy when her tains a fixed oil in every respect pret bead aches. There won't be any younger sister to insist on reading some trashy novel while she does all the yield of the olive fruit, and when the work. She will not have with me the production reaches an importance a home like she has been used to,

Rabbit Makes Home Run.

Though he was the first man up, two runners crossed the home plate when Jake Thielman, formerly a big leaguer, now of the St. Cloud team. lined out a hit to center field in the game with Long Prairie.

The ball, that was driven clear to the fence, hit a rabbit that was brow. French, Italian, Spanish and Portusing in the long grass. The hare guese, and possesses no sex in Teustarted for the diamond, touched second base, sped along the base line a few jumps ahead of Thielman, rounded third base on account of the fans on the side line and dashed across the home plate with the player hard on its heels.

"If we'd had another base to go." said Thielman, "I would have had to sons. The ship to him is always a tell the rabbit to get out of the way and let someone run that could run." -New York World.

Facts Connected With Dissemina-tion of Plague Germs,

That the migratory habits of rodents have a bearing upon the spread of disease is not generally known, but the United States public health service, as a result of experiments conducted in plague epidemic work at New Orleans, asserts that such is the case. This is but another illustration that the field of preventive medicine GERMANS FAIL IN POLAND is especially broad, and investigators therein must be thoroughly familiar with the life history and habits of flies, mosquitoes, ticks and even ro-

Several hundred captured rats were marked for purposes of identification by having their ears punched, care being taken not to render them conspicuous, as felow rodents wage relentless warfare upon those which appear different from their kind. They were then released in the heart of the city, and allowed to shift for themselves. Trapping was carried on in all sections, and each rat was labeled as to the locality caught. Fully one-quarter of the rats made widespread excursions, that is, they were recaptured at points from one to four miles from where they were liberated. In one instance, a rat traveled 19 blocks, crossing one of the widest and busiest streets in the city, where there was no subterranean passage and was retaken within 60 hours from the time of its liberation. From the experiments it is concluded that the semidomesticated rat has migratory habits similar to wild animals, and that these habits are influenced by abundance or scarcity of food, facility for harborage, or the presence of natural enemies. It is also believed that certain inexplicable instincts tend to make the rat a wanderer. That in this instance the "homing" instinct was not responsible for the migration of rodents explains many facts connected with the dissemination of plague: it will also doubtless prove enlightening to those who have attempted to exterminate rats for economic reasons. The Indian plague commission was of the opinion that rats seldom journeyed from one section of the city to another, but the conclusion of the public health officials is quite the opposite. As a measure of the success of trapping operations, it is interesting to note that over one-half of the rodents liberated were recaptured within a month,

Ships Are All "Ladies." The word "ship" is masculine in tonic and Scandinavian. Perhaps it would be error, suggests the Marine Journal, to trace the custom of feminizing ships back to the Greeks, who called them by feminine names, probably out of deference to Athene, goddess of the sea. But the Englishspeaking sailor assigns no such realady, even though she be a man-o'-war. She possesses a waist, collars, stays, laces, bonnets, ties, ribbons, chains, watches and dozens of other distinctly feminine attributes.

PAIN WITH SEVERE WOUNDS Is Comparatively Little, Says Eminent Surgeon, and Much of Our Pity

is Wasted.

An eminent army surgeon has said that much of our pity for the victims of severe wounds on the battlefield is terribly wounded suffer comparatively little pain, and that men who are wounded unto death pass away without undergoing much suffering.

Surgeons who have experience on the war fields ought to know definitely concerning the amount of pain suffered by the variously wounded. It is known, of course off the battle line as well as on it, that a comparatively slight injury which involves the tearing of the flesh and the disturbance of the nervous system causes acute pain. Nature, it is said, makes provision that the terribly injured shall not suffer the agonies which ordinarily are considered as the necessary accompaniment of apparently cruel wounds.

It does not seem, however, as if it were exactly human to say that pity for the terribly injured is wasted. The pity is as much for the wound and for the future disablement of 'he victim which come from laymen bear out, however, the surgeon's word that the terribly hurt do not suffer much, at least at the time of the infliction of the injury.

One of the firemen on the Lusitania had his right arm blown off at the shoulder either by an explosion in the engine room or by the torpedo which sent the ship to the bottom. The man did not lose consciousness and managed to make his way to the deck. from which he jumped into the water. He kept himself affoat for nearly half an hour. He was picked up, and later his terrible wound was attended to He has recovered, and he says that he was hardly conscious of pain that cattle in that vicinity were being until several hours after the injury was inflicted.

> Nature is called the mother. Sometimes she is cruel and sometimes she is kind. She makes a pin prick hurt and yet tempers suffering when the cut goes deep. She works curiously, but, doubtless, according to a well orno thorough understanding.-Chicago Evening Post.

"Safety First."

An American soon to sail for Lon-don will wear while asleep a specially made rubber suit with a cork lining. He takes no chances. There are several pound of lead in the feet of the suit to keep the wearer's body in an upright position.

British India's 1914 imports were valued at \$508,000,000.

VAST RICHES HIDDEN University of Notre Dame,

Wealth Brought to Light Only by Death.

London Newspaper Records Cases That Are Remarkable in the Idiosyncresies of Nature That They Reveal.

After the accidental death of a spinster who had lived in Twickenham for many years all alone, and in circumstances which suggested poverty, property valued at many thousands of dollars was found in her cottage, which was sadly in need of repair, London Answers states.

Money was discovered all over the house; deeds of property and stocks and shares were found stuffed underneath a mattress. It was also found that the old lady had in two banks over \$10,000, nearly \$1,000 in the post office savings bank, and that she had insured her life in four offices for sums totaling \$40,000.

Nor was this all. The whole of the interior of the cottage was elaborately furnished. Its walls were hung with valuable oil paintings by well-known artists, and lying about everywhere were rings and other personal adornments, set with diamonds, opals, rubies and other precious stones.

The old lady was eighty when she met her accidental death, and, as she in reality wasted. He adds that the left no will, and, it would appear, no relatives, all these good and chattels revert to the crown.

But this Twickenham treasure house sinks into insignificance beside another discovered within a walk of it at Chiswick. This house is one of the biggest in that riverside suburt, and apparently one of the most deserted. its windows uncurtained, its large grounds a wilderness, Nobody seemed to know much about it, but suddenly the police paid it a visit.

The house of 16 rooms proved a perfect cave of Aladdin. The interior room. was elaborately furnished, while on the walls hung many beautiful paintings, including four by that greatest of English masters, Sir Joshua Rey-

But this was only the beginning of wonders. Every room was packed in some other direction and will be with costly treasures. Gold and silver | quite conscious of its presence, but vessels were heaped into cupboards: jewelry and precious stones packed loose in chests and drawers. There were dozens of cases of cut-

gold, valuable pottery, boxes full of bright, but the instant the eyes are silver and jewelry, beautiful embroidery and lace, bed and table linen without end, rugs and skins and a thousand things still unmentioned which required a line of pantechnicons to remove. No wonder, indeed, when it is added that the treasure trove included, among so much of the rich and rare, 12 gas-cooking stoves and 30 asbestos-heating stoves! The discovery of the safe contain-

ing much of the more valuable jewelry was the result of a smart piece of Germany and England. Several dealdetective work. Behind a brass bed- ers said they were now out of stock stead one of the officers noticed that there were a dozen or more embossed rosettes. To all appearances they formed part of the wall-paper design. But the quick-witted searcher tried them all, and found that one had revolved. Further investigation revealed neral)-Pardon me, but are you one a keyhole.
